COLLEGE OF COMPUTING AND INFORMATICS
PUTRAJAYA CAMPUS

ASSIGNMENTS NO. 1:
SECURITY REQUIREMENTS

SEMESTER 1 2026/2027

PROGRAMME : Bachelor of Computer Science (Cyber Security) (Hons.)
Bachelor of Software Engineering (Hons.)

SUBJECT CODE : CCSB5113

SUBJECT : SOFTWARE SECURITY

START DATE : WEEK 2 (3 SEPT 2026)
DUE DATE : 12 SEPT 2026, 1159PM

NAME OF GROUP : MARVELLOUS GROUP

NAME OF MEMBERS :

No.	Full Name	ID Student	Class Group	Tasks
1.	Khairunnisa bt Osman	12345678	01B	Q1

INSTRUCTIONS TO STUDENTS:

1. Answer **ALL** questions.
2. All answers must be submitted via Brighten.
3. The submission must be in Excel format with the first tab may consists of your group member details (Full Name, ID Student, Class Group and Task)

Assignment 1 – Security Requirements Development

Instructions

1. Select the **Scenario** according to your group.

2. Identify Critical Functional Requirements (FRs) of your system.
    - Label each FR as FR1, FR2, FR3, etc.

3. Identify Abuse Cases.
    - Describe potential misuse or attacks on your FR.
    - Link each abuse case to the relevant FR.

4. Identify Security Requirements (SRs) of your system and justify your options.
    - Label each SR as SR1, SR2, SR3, etc.
    - **Map each SR to the FR(s) it protects and abuse cases it mitigates**.
    - Include a brief justification explaining **why the SR is needed**.

5. Map your SRs with at least one recognized best-practice standard. Examples include:
    - ISO/IEC 27001 – information security management
    - OWASP Top 10 – common web risks & mitigations
    - ISO/IEC 27034-3 – Application Security Management Process
    - NIST SP 800-53 – security and privacy controls
    - PCI-DSS – payment security (relevant to fee payment)
    - Other that you may think relevant

6. Organize all requirements in a proper table.

7. These requirements will be used later in threat modelling and design (Lab 2).

Scenario 1: Club & Society Hub (Group 01 and Group 09)

Students find the suitable clubs by joining the platform

- Campus event discovery
- Club and society activities
- Join the clubs

Scenario 2: University Hostel Management System (Group 02 and Group 10)

Students apply for hostel rooms and view allocation results. Log in using their banking credentials

- Student application & room search queries
- Address or student info
- Capacity status

Scenario 3: Library Management System (Group 03 and Group 11)

Users search books, borrow, and return items.

- Book search & borrowing queries
- Book ID input buffer limits

Scenario 4: Online Food Ordering System (Group 04 and Group 12)

Users browse menus, place food orders, and track delivery status.

- Search food / restaurant
- Quantity, address, or notes fields

Scenario 5: Smart Attendance Tracking System (Group 05 and Group 13)

Students mark attendance using ID or QR code.

- Student record lookup queries
- Student ID

Scenario 6: Online Donation & Charity Platform (Group 06 and Group 14)

Users donate to campaigns and view donation history.

- Campaign search & donation queries
- Donor message
- Payment

Scenario 7: Learning Management System (Group 07 and Group 08)

Lecturers upload materials, students submit assignments.

- Assignment title / description input handling
- Late submission, missing files

--- END OF QUESTION PAPER ---
