COLLEGE OF COMPUTING AND INFORMATICS
PUTRAJAYA CAMPUS

LAB NO. 3:
STRIDE Threat Identification using TMT

SEMESTER 1 2026/2027

PROGRAMME : Bachelor of Computer Science (Cyber Security) (Hons.)
: Bachelor of Software Engineering (Hons.)

SUBJECT CODE : CCSB5113

SUBJECT : SOFTWARE SECURITY

DATE : WEEK 5 (21 Sept – 25 Sept)

NAME OF GROUP : MARVELLOUS GROUP

NAME OF MEMBERS :

No.	Full Name	ID Student	Class Group	Task
1.	Khairunnisa bt Osman	12345678	01B	Q1

INSTRUCTIONS TO STUDENTS:

1. Answer **ALL** questions.
2. All answers must be submitted via Brighten.

LAB NO. 3: STRIDE Threat Identification using TMT

1. Identify STRIDE Threats from the design: output from Lab 2

i. Click 'View/Threats Lists' to see automatically generated STRIDE threats.

ii. Microsoft Threat Modelling Process, focusing on the **STRIDE** approach:
Spoofing: Pretending to be someone else
Tampering: Modifying data
Repudiation: Denying an action
Information Disclosure: Exposing sensitive data
Denial of Service (DoS): Interrupting system availability
Elevation of Privilege: Gaining unauthorized access

iii. Screenshot the threat suggested and submit the screenshot as part of submission.

Threat List

ID	Diagram	Last Modified	Title	Category	Short Description	Interaction	Priority
1	Diagram 1	Generated	Cross Site Scripting	Tampering	Tampering is the act of altering the bits. Tampering with a proce	FR.1: Login	High
4	Diagram 1	Generated	Cross Site Scripting	Tampering	Tampering is the act of altering the bits. Tampering with a proce	SR1: Multi-Factor	High
2	Diagram 1	Generated	Elevation Using Impersonation	Elevation Of Privilege	A user subject gains increased capability or privilege by taking	FR.1: Login	High
5	**Diagram 1**	**Generated**	**Elevation Using Impersonatior**	**Elevation Of Privilege**	**A user subject gains increased capability or privilege by tal**	**SR1: Multi-Facto**	**High**
3	**Diagram 1**	**Generated**	**Spoofing the Student External**	**Spoofing**	**Spoofing is when a process or entity is something other th**	**SR1: Multi-Facto**	**High**
6	**Diagram 1**	**Generated**	**Spoofing the Student External**	**Spoofing**	**Spoofing is when a process or entity is something other th**	**FR.1: Login**	**High**

iv. Put all the threats in a proper table in **Excel** as per example below:

ID	Category	Title	Short Description	Interaction	Priority
1	Tampering	Cross Site Scripting	Tampering is the act of altering the bits…	FR.1: Login	High

2. Assess the STRIDE Threats and Impacts

i. Assess the suggested threats by TMT by evaluating the likelihood of the threats and impacts.

The legend of Likelihood Threat:
High: 3 (Frequent case)
Medium: 2 (Sometimes)
Low: 1 (Rare case)

The legend of Likelihood Impact:
High: 3 (Operation, image and cost are highly affected)
Medium: 2 (Operation, image and cost are mediumly affected)
Low: 1 (Operation, image and cost are minor affected)

ID	Category	Title	Short Description	Interaction	Priority	Likelihood of Threat	Impact	Likelihood of Impact
1	Tampering	Cross Site Scripting	Tampering is the act of altering the bits…	FR.1: Login	High	2	Unauthorized access	3

ii. Prioritize the threats by evaluating the overall risk value. Using your own justification, you can set the legend for your new risk level as per example below:

High: 6-10
Medium: 3-5
Low: 1-2

ID	Category	Title	Short Description	Interaction	Priority	Likelihood of Threat	Impact	Likelihood of Impact	Risk Value	New Priority
1	Tampering	Cross Site Scripting	Tampering is the act of altering the bits…	FR.1: Login	High	2	Unauthorized access	3	2x3 = 6	High

For Submission

1. STRIDE Threats in Excel (in the first tab)
2. Screenshot from TMT (in the second tab of the same Excel file)
